

# Understanding Your Broadband

Learn about broadband to understand the quality speeds you need to effectively access the internet.

## WHAT IS BROADBAND?

Broadband is the transfer of wide bandwidth data over a high speed internet connection. Broadband gives us access to the things we need most - education, quality jobs, healthcare, and our community.

## WHAT SPEED DO I NEED?

The Federal Communication Commission's standard speed is 25/3 Mbps, which is the minimum speed recommended for most households. In order to effectively access the internet, individuals need broadband speeds of at least 25/3 Mbps.

## AFFORDABLE CONNECTIVITY PROGRAM

The Affordable Connectivity Program is an Federal Communications Commission benefit program that ensures that people can afford the broadband they need.

- The program provides a discount of up to \$30 per month towards internet service based on household eligibility, and a discount of up to \$75 per month for households on qualifying Tribal land.
- Eligible households can also receive a discount of up to \$100 to purchase a computing device from participating providers.

Learn more about this program and find out if you are eligible by scanning or clicking the QR code below!
